

**EARTH  
CONNECTIONS  
THROUGH ART  
CONFERENCE REPORT**

**MARCH, 2021**

**PREPARED BY  
BERNARD MOLHO & AGGIE KWONG**

# WHERE WE ARE NOW

LOCATED IN UGANDA (AFRICA ), HONG KONG, USA, AND INDIA

Founded in August, 2020, a collaboration between Usanii Village Africa and Project Planet A , the Earth Connections Through Arts is an effort to address climate change, Life on Land, and Below Water. Through the creation of Art, we are riding on the theme, "Plastic Pollution" and we organized this conference to bring together artists across the globe to cause a positive impact in recycling plastics as an approach to conserving the environment. The March, 2021 Conference happened virtually and we had at least 30 young environment enthusiasts participate.

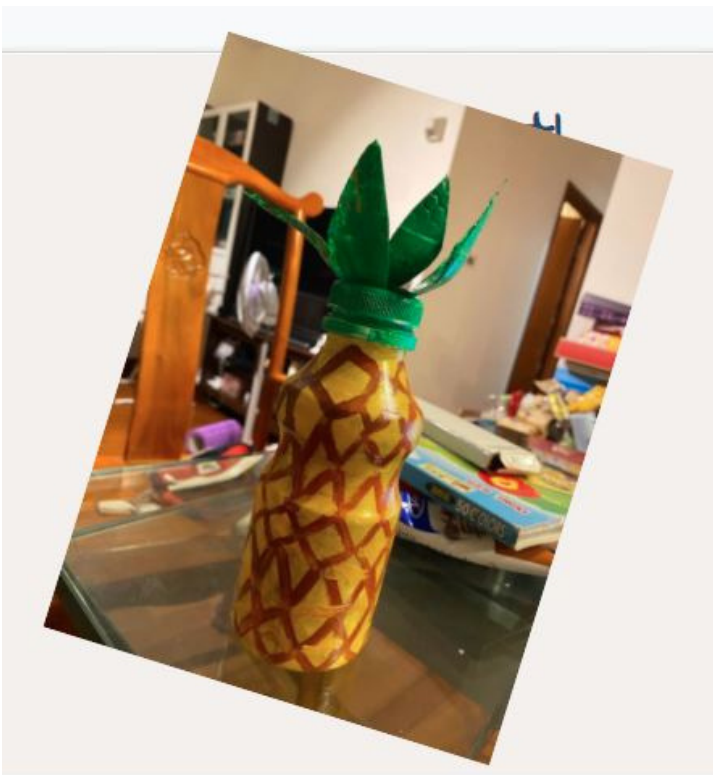

# INSPIRATIONAL ARTWORKS

The art works presented during the conference were purposively selected to suit the purpose of inspiring other artists who are passionate about addressing plastic pollution in their communities. This greatly inspired more young people who are now working on their projects for Exhibition to happen in Uganda. The date of the exhibition was extended to October, 2021 to give more time to the artists and also enable greater impact and reach.

# INSPIRATIONAL ARTWORKS

## RECOMMENDATIONS

1. The exhibition in Uganda to be postponed to October, 2021 to give chance to artists better their art pieces.
2. Recruit country ambassadors to expand out reach and impact.
3. Start a mentorship programme, recruit mentors to do monthly trainings to the art fellows across the globe.
